

Office of Technology & Student Systems  
Union City Education Center

Dear Parent of a Union City School District Student in Grades 5-8,

Union City School District is committed to providing students with the best educational resources and technology, to facilitate this, the district utilizes a free suite of online applications called G-Suite for Education (Google) to integrate 21st century technology tools into the curriculum. G-Suite for Education Apps are similar to Microsoft Office but allow students and teachers to create, share, collaborate, and store documents and assignments online, and access them from any computer or device. A description of the G-Suite for Education tools can be found at <http://support.google.com/edu>

Because the District's use of G-Suite for Education involves online storage of student class work and a limited collection of personal information from students under the age of 13 (first name, last name, and username), the District requires written parent/guardian consent for students to use G-Suite for Education. Parent/guardian consent is entirely voluntary. However, students who do not have permission to use G-Suite for Education will not be able to create or share assignments online or access at home.

Our children's safety, security and privacy are of primary importance to us. School staff will monitor student use of applications when students are at school. Student responsibilities are outlined in the policy for Acceptable Use of District Computer Network(s)/Computers and Resources by Students, under the Parents tab to Policies & Procedures > Technology <<http://ucboe.edlioschool.com/apps/pages/pp/technology>>. Parents should monitor their children's online access at home. Parents and students should understand that:

- Students will not have email accounts nor will they be able to share directly with people outside the ucboe.us domain;
- Students who do not have permission to use G-Suite for Education will not be able to create or share assignments online, in school or at home, or use a Chromebook;
- Google's Privacy Policy prevents Google from sharing personal information, and they do not access content stored on G-Suite for Education unless the district gives them explicit permission to do so for troubleshooting purposes. More information about G-Suite for Education and its privacy policies is available at <http://www.google.com/edu/trust/>.

The District's use of G-Suite for Education is also subject to two important privacy laws: The Family Educational Rights and Privacy Act ("FERPA") and the Children's Online Privacy Protection Act ("COPPA").

FERPA protects the privacy of education records, including student class work stored in G-Suite for Education. Pursuant to FERPA, the District may not disclose such records without parental consent except in limited circumstances.

COPPA requires commercial website operators to get parental consent before collecting any personal information from children under the age of 13. COPPA allows, but does not require, schools to act as agents for parents in providing consent for the online collection of limited student personal information within the school context.

In addition to the core Google applications, the district may make additional applications available provided that any such app supports student achievement while reasonably ensuring a safe and secure environment.

G-Suite for Education

I have read the attached G-Suite for Education Background Information, and I am aware that the District utilizes a suite of online applications called G-Suite for Education to facilitate collaboration and communication among students and staff when creating, sharing, and storing documents and assignments online.

I understand that when a District user account is created for the student, a corresponding G-Suite for Education account will be automatically created, causing information about the student (first name, last name, and username) to be collected and securely stored electronically. I further understand that the student may store class work or files in G-Suite for Education; depending on the sharing options selected by the student, these files may be accessible to someone other than the District or the Student, such as classmates. I have read the privacy policies associated with the use of G-Suite for Education

I give permission for a G-Suite for Education account to be issued to the Student.

I do not give permission for the Student to have G-Suite for Education access.

Check one:

My child is under the age of 13.

My child is 13 or older.
