

5350 - Student Suicide Prevention

The Board of Education recognizes that depression and self-destruction are problems of increasing severity among students. Students under severe stress cannot benefit fully from the educational program and may pose a threat to themselves or others.

The Board directs all school district staff members to be alert to a student who exhibits warning signs of self-destruction or who threatens or attempts suicide. Any such warning signs or the report of such warning signs from another student or staff member shall be taken with the utmost seriousness and reported immediately to the Principal or designee.

The Principal or designee shall immediately contact the parent(s) of the student exhibiting warning signs of suicide to inform the parent(s) the student will be referred to the Child Study Team or a Suicide Intervention Team, appointed by the Superintendent or designee, for a preliminary assessment. Upon completion of the preliminary assessment, the Principal or designee shall meet with the parent(s) to review the assessment. Based on the preliminary assessment, the parent(s) may be required to obtain medical or psychiatric services for the student. In the event the parent objects to the recommendation or indicates an unwillingness to cooperate in the best interests of the student, the Principal or designee will contact the New Jersey Department of Children and Families, Division of Child Protection and Permanency to request intervention on the student's behalf.

The Superintendent shall, in consultation with appropriate teaching staff members and mental health organizations, develop and implement a stress reduction program for students in grades PREK through 12 to address the problem of depression, help students toward alternative ways of resolving stressful situations, and encourage students to help one another.

In accordance with the provisions of N.J.S.A. 18A:6-111 and 18A:6-112, as part of the required professional development for teachers as outlined in N.J.A.C. 6A:9C-3 et seq., every teaching staff member must complete at least two hours of instruction in suicide prevention, to be provided by a licensed health care professional with training and experience in mental health issues, in each professional development period. The instruction in suicide prevention shall include information on the relationship between the risk of suicide and incidents

of harassment, intimidation, and bullying and information on reducing the risk of suicide in students who are members of communities identified as having members at high risk of suicide.

The Superintendent shall prepare and disseminate guidelines to assist school district staff members in recognizing the warning signs of a student who may be contemplating suicide, to respond to a threat or attempted suicide, and to prevent contagion when a student commits suicide.
