

Mrs. Martens semester finals

Computer literacy

You need to go onto Canvas.ccsd.net to review for the test.

Review each of the 5 unit tests you have taken:

- 1.1 Introduction to engineering
- 1.2 The design process
- 1.3 Measurement
- 1.4 Sketching and dimensioning

Open up each quiz. It will show the questions, your answer, and the correct answer. If you got the answer correct, just review the question and answer. If you missed the question, make a flashcard with the question and correct answer.

You may also log into Quizlet.com to review the vocabulary terms. However, the final is a combination of all the unit tests you have taken.

The unit quizzes will close on December 18, so do NOT wait until the last minute to study.
