FOR STUDENTS ENTERING GRADES 3-8

# coastal studies

Join the Lloyd Center  
for an exciting summer outdoors!

Animal collection, habitat investigations, and fishing are just a few of the activities offered through the 2019 summer programs. In its 38th season, the Lloyd Center's Summer Programs are designed to give motivated students an opportunity to explore different aspects of environmental science.

All sessions include field study, laboratory work, and fun! Member prices apply to those holding a current family membership. Information/

Scholarship applications are available. Please contact Ashley Gesner for more information: 774-628-9241 or [summer@lloydcenter.org](mailto:summer@lloydcenter.org)

### WETLAND WONDERS

3rd-5th Grades

July 15-19, 9am-3:30pm

members \$325, non-members \$375

Do you love exploring? Grab your boots and join us as we become field biologists for a week! Tromp through muddy salt marshes and discover who's living in fresh water habitats. Collect, observe and interact with live animals and help real-life scientists! Go nature!

### TIDAL SURGE: THE OCEAN & CLIMATE CHANGE

4th-6th Grades

July 22-26, 9am-3:30pm

members \$300, non-members \$350

Passionate about the ocean and its creatures? Join us for a saltwater-drenched week of field trips, discussions, experiments and more. Discover the ways in which climate change can affect local coastal habitats... and become part of the solution!

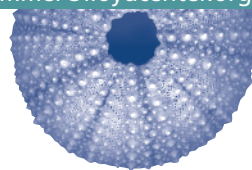

### FOREST EXPLORERS

3rd-5th Grades

August 5-9, 9am-3:30pm

members \$325, non-members \$375

What's in the woods? Join us in investigating 82-acres of maritime forest. We will learn what plants make up the forest, search for insects, seek out amphibians, listen for birds and learn which mammals call it home. Get ready for an adventure!

### MARINE BIOLOGY

6th-8th Grades

August 12-16, 9am-3:30pm

members \$325, non-members \$375

Come join us as we explore the lush local estuarine and beach ecosystems! Collect live animals from the ocean while beachcombing. Observe various adaptations coastal organisms use to survive and thrive. First-hand observation of creatures and marine fun make this program a splash!
