**Proposal 1**

**School Improvements**

**Music**
Replace aging school-owned band and orchestra instruments, and purchase additional instruments for music at the elementary level.

**Safety & Security**
Install hardware and technology as well as new locks and safety glass on interior classroom doors to continue our efforts to make our schools more secure.
Upgrade High School fire alarm system.

**Technology**
Provide instructional technology that connects students to the world of work and strengthens post-graduation employability.

**Proposal 2**

**Community Pool**
The electrical and mechanical systems in our middle and high school pools are at the end of their lifespans. Replacing them would cost hundreds of thousands of dollars, and they would be out of commission for an extended period of time. The existing pools also have some functional limitations with the current configurations. Survey respondents suggested the option of a natatorium separate from the schools. This would allow the pool facility to be used by Grandville and Calvin swim teams and the community during the week without impeding on the school day. The current pools would be repurposed into educational space.

**GRANDVILLE HIGH SCHOOL**

Conceptual building and site diagrams depict potential building and site relationships. Actual design to be determined by school community and staff.
Proposal 1
School Improvements

Middle School
Accommodate growth and create space in K-8 by turning Grandville Middle School into a 5th-6th grade building and constructing a new middle school by the high school.

5th and 6th grade would move to the current middle school to provide educational space for specials and additional programming.

Air Conditioning
Install air conditioning in the schools without A/C, including the middle school and five elementary schools, to enable a more effective learning environment.

Music
Replace aging school-owned band and orchestra instruments, and purchase additional instruments for music at the elementary level.

Safety & Security
Install hardware and technology as well as new locks and safety glass on interior classroom doors to continue our efforts to make our schools more secure.

Technology
Provide instructional technology that connects students to the world of work and strengthens post-graduation employability.

Conceptual building and site diagrams depict potential building and site relationships. Actual design to be determined by school community and staff.
Proposal 1
School Improvements

Preschool
Renovate a portion of an in-town building to accommodate a growing number of families requesting preschool and child care.

Middle School
5th-6th Grade Restructuring
Accommodate growth and create space in our elementary schools by turning Grandville Middle School into a 5th-6th grade building and constructing a new middle school near the high school.

A dedicated building for 5th and 6th graders would allow them to have more developmentally appropriate experiences than they would have in an elementary building that contains children as young as five. Restructuring would allow for a broader curricula and expansion of art & music programs.

Air Conditioning
Install air conditioning in the schools without A/C, including the middle school and five elementary schools, to enable a more effective learning environment.

Music
Replace aging school-owned band and orchestra instruments, and purchase additional instruments for music at the elementary level.

Safety & Security
Install hardware and technology as well as new locks and safety glass on interior classroom doors to continue our efforts to make our schools more secure.

Technology
Provide instructional technology that connects students to the world of work and strengthens post-graduation employability.
