

We are thrilled that Resurrection of Our Lord School is participating in the FLUency school health program!

This program will keep our school healthier by:

- Giving families a FREE Kinsa Smart Thermometer, a \$20 value
- Showing families "what's going around" our school (it's all anonymous)
- Reducing sick days through early detection and increased awareness
The more families that participate, the more successful the program will be in keeping our students healthier throughout this school year.

Signing up for the program is EASY:

1. Visit kinsaforschools.com from your smartphone
2. Download the Kinsa app onto your phone
3. Search for our school name and join!

Thermometers will ship directly to our school in October and you will receive a notice when they arrive.

Thank you for your help in keeping our students healthy and in class
