Let's Make A Difference

Travelvax/Vaxanation Travel Health Clinic

1:00pm -3:00pm

July 17th

August 20th

We will be at your child local Elementary School, to vaccinate the students for the required vaccines. At this time, we would like to inform you. Come this August we will start running our Route System.

We will be in your local area on the second Tuesday of every month. What is the Route System you might ask? The Route System allows our staff to communicate with your local school nurse to see what students may need to be vaccinated. We will communicate with the local nurse a week before to see what children need vaccines at this time.

Vax-a-nation is a mobile vaccination clinic that serves state of Texas. We operate with the Texas Department of Health's Vaccines for Children's program. This is a federally funded program that allows us to provide low-cost vaccinations to children 18 years and under. We have been in business for 20 years, and have given injections in schools, businesses, churches, and many venues. In addition, we have given countless influenza, travel and other vaccinations throughout the state. Our vaccine administrators are well trained and experienced at administering immunizations painlessly and accurately. We do on-site clinics; just provide our office with dates and times so we can add you to our schedule.

- Children 18 and younger \$14 for the first vaccine and \$10 each additional. We also take Medicaid and Chip
 - We have Flu and all state required vaccines.
- We have B12 and B- Complex shots available for those teachers or staff interested in better sleep (helps with insomnia), weight loss and a boost of energy. Right now we are also fully stocked with our Flu vaccine for adults as well. Prices for each vaccine vary and we accept cash, credit card, and check.
