

# iReady At Home Instructions

## Things to Remember:

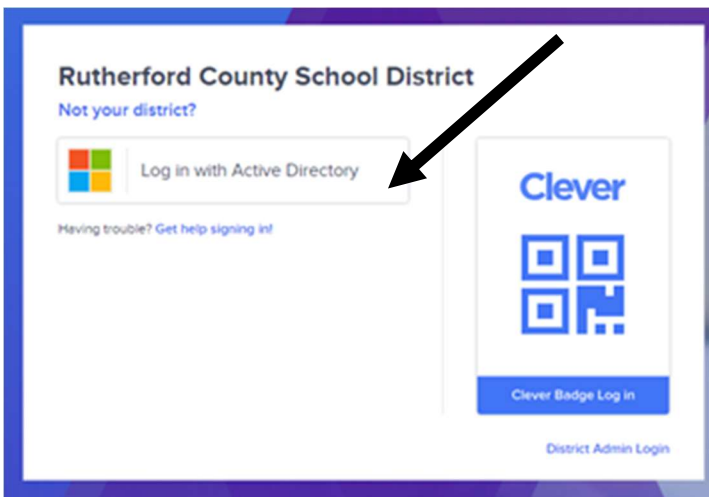

You must use the Chrome browser on a desktop computer, laptop or iPad (see below for iPad details)

iReady will **not work** on tablets or phones through browsers (Safari, Chrome, Firefox, etc).

You may need to set up a guest profile on your computer for your child if they have trouble logging in. Our program uses Office 365 to log in and may interfere if you use this as your email provider or have multiple children using iReady.

## Getting to iReady from Clever

Go to: <https://clever.com/in/rcschools>

Click "Login with Active Directory." You will then be prompted to put in your username and password.

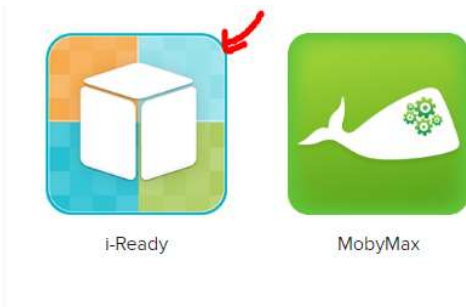

Sign in  
https://fs.rcschools.net

Username

Password

Students use the same username that they use to log in to the computer. Their password is the same password they use at school.

You will then click on iReady to get to the program.

## Getting on iReady Using iPad

Please note if using an iPad: There are two apps needed for this to work. You will need to download the IReady app and the Clever App from the app store.

Students will open the Clever App and log in using information above or if they have a badge printed from school they can scan the badge to log in.

Then they will choose iReady from their dash board.

A window will pop up that says "Open in iReady?"

Please click okay.

**The iPad must be updated to the latest IOS. (See below)**

### Compatibility Requirements

In order to ensure students have a positive and performant experience, support of the *i-Ready* app is restricted to iPads compatible with iOS 10, such as the iPad 4, iPad Air, iPad Air 2, iPad Pro (12.9" & 9.7"), and the new iPad model released by Apple in 2017. iPad minis, iPhones, and other tablets are not supported.
