## **Family Life Program** (for review- sign on acknowledgment sheet)

Dear Parents:

Starting in the Month of April, the classroom teachers will be teaching the Family Life Program. We will use the program published by Benziger.

Family Life education is intended to provide a comprehensive view of human development and behavior, and personal relationships. The purpose of formalized Family Life education is to inculcate Catholic values, virtues, and attitudes, which relate to the family life of the student.

Instruction on matters relating to family life will be integrated where appropriate into Religion and/or Science. Instruction will be introduced when appropriate in a manner suited to the understanding of the age level of the students.

Formal instruction on the subject of human reproduction through an orderly and comprehensive development of the topic is principally the responsibility of you, the parents. Every effort will be made to supplement your instruction.

If you would like to look at your child's text, please feel free to ask the teacher to preview the book before making your decision. If you have a question regarding Family Life education, please feel free to contact me anytime.

May God bless you and your family always!

Sincerely,

Mrs. Aimee Dyrek  
Principal
