

PCHS MATHEMATICS PLACEMENT POLICY (approved 5/15/18)

1. PCHS will consider multiple objective academic measures to determine appropriate math placement for freshmen. These measures include:

- PCHS Algebra Placement Exam given in the spring before the freshman year
- PCHS Algebra Placement Retest given in July before school starts, if necessary
- Course completion and grades earned in previous math classes
- California Smarter Balanced Assessment Consortium (SBAC) test results and achievement levels

Please refer to the **PCHS Mathematics Placement Criteria** for specifics as to how these measures are used to determine placement.

2. Using ID#s as the only identifier, student test results from the PCHS Algebra Placement Exam/Retest will be analyzed for proficiency on all essential standards assessed (see **PCHS Algebra 1 Essential Standards and Skills**). Based on their performance on the test, a student will either be required to take an Algebra 1 class or will be placed into the next appropriate math level. Students will NOT be held back solely on the basis of race, ethnicity, gender, or socioeconomic background. If a student does NOT take the Placement Exam or Retest, they will be placed into an Algebra A or Algebra 1A class as outlined on the **PCHS Mathematics Placement Criteria**.

3. Students who take the Placement Exam in the spring will be notified by mail of the placement. If a student (or their parent/guardian) has questions/concerns regarding the placement or questions the placement, (s)he has the following options:
 - Contact the Math Placement Test Coordinator.
 - Take the retest on the scheduled date in July.
 - Demonstrate proficiency of all required standards on the Checkpoint Test given the first week of school. (See #4 below.)

Because there is not sufficient time before the beginning of the school year for mail notification, students who take the test in July will be informed of their final placement on their fall semester schedule of classes. Scores and placement information will also be available upon request when they are available.

Palisades Charter High School

More Than 50 Years of Innovation and Excellence

4. During the first week of school, PCHS will administer a Checkpoint Test in all Algebra 1 classes to determine if a student's placement requires adjustment. If a student is able to demonstrate proficiency on ALL required standards at this point AND has earned a grade of C or better in UCOP-approved prerequisite courses, the student will be scheduled into a math class at the next appropriate level as space permits. Priority will be given to students who enrolled after the July test date as the Checkpoint Test would be their first opportunity to test. The class schedule of a student registered before the July test date who did NOT take either the PCHS Placement Exam or the PCHS Placement Retest may be impacted to accommodate these late changes.
5. A report and analysis of the Placement Testing results will be shared annually with the Math Department, Academic Accountability Committee, and the Board of Trustees. The exams will also be reviewed annually and modified as needed.
6. This Math Placement Policy will be publicized and shared with all stakeholders, including Revere Middle School and other feeder schools from which our students regularly matriculate, via our website. Information will also be provided as part of the 9th grade enrollment packet.

PCHS MATH PLACEMENT CRITERIA

Students currently taking AND passing Algebra 1, Geometry, or Algebra 2 in Middle School:

LAST MATH CLASS COMPLETED IN MIDDLE SCHOOL	CRITERIA	HIGH SCHOOL MATH PLACEMENT
Algebra 2AB or Geometry AB or Algebra 1AB (C or better)	Scored ADVANCED levels of achievement on ALL assessed Algebra 1 Essential Standards and Skills on the PCHS Placement Exam or Re-Test	HONORS college-prep course at the next math level
	PASS PCHS Placement Exam or Re-Test	College-prep course at the next math level
	Demonstrates proficiency with Alg 1A standards	Algebra 1B
	Does NOT pass/take PCHS Placement Exam AND PCHS Re-Test	Algebra 1A

Students who are currently not passing Algebra 1 or are taking pre-Algebra in Middle School:

LAST MATH CLASS COMPLETED IN MIDDLE SCHOOL	CRITERIA	HIGH SCHOOL MATH PLACEMENT
Algebra 1 AB (D or FAIL)	PASS PCHS Placement Exam	Algebra 1A
	Does NOT pass/take PCHS Placement Exam AND PCHS Re-Test	Algebra A
Algebra A1/A2, Algebra Readiness or Other Pre-Alg courses	PASS PCHS Placement Exam	Algebra 1A
	Does NOT pass/take PCHS Placement Exam AND PCHS Re-Test	Algebra A

QUALIFICATION FOR HONORS LEVEL MATH CLASSES -

- An incoming 9th grade student may only qualify for honors math classes by demonstrating advanced levels of achievement on all of the assessed Algebra 1 Essential Standards and Skills on the on the PCHS Placement Exam OR the PCHS Re-Test.

RETESTING OPPORTUNITY -

- The PCHS Re-Test in July is available to students who took the PCHS Placement Test in the spring.

CHECKPOINT AFTER SCHOOL BEGINS -

- During the first week of school, PCHS will administer a Checkpoint Test in Algebra classes to determine if a student's placement requires adjustment. If a student is able to demonstrate proficiency on ALL required standards at this point AND has earned a grade of C or better in UCOP-approved prerequisite courses, the student will be scheduled into a math class at the next appropriate level as space permits.

PCHS MATH PLACEMENT TEST ASSESSED STANDARDS AND SKILLS

The following standards are assessed on the PCHS Placement Exam and student proficiency is evaluated for each standard to determine math course placement.

- Integer Operations
- Greatest Common Factor, Prime Factorization
- The Coordinate Plane
- Evaluate Expressions
- Simplify Expressions
- Decimals, Fractions and Percent
- Solve Equations
- Solve Inequalities
- Graph Linear Equations
- Write Equations of Linear Functions
- Inequalities and Systems of Equations
- Simplify Polynomial Expressions
- Factor Polynomials
- Solve Quadratic Equations
- Functions
- Data Analysis
- Angle Relationships and Parallel Lines
- Triangle Trigonometry
- Special Right Triangles and the Pythagorean Theorem
- Similar & Congruent Triangles and Proportional Reasoning
