### About The Class

Enter the virtuosic world of clowning, tumble the roads of acrobats, and unlock the potential of creative circus while we explore in a safe and joyous way. Throughout this fun and exciting series we will work with circus equipment to develop motor and coordination skills, kinesthetic awareness, partner balancing, and creative movement to uplift spirits and inspire growth.

### About The Teacher

Marina Karadjieva started teaching circus skills to her friends and their kids sometime in 2003 while being an active performer. She loved sharing her passion and knowledge with others. Over the years Marina has taught circus, aerial arts, gymnastics, creative movement and yoga to kids around the world.

Utilizing hands-on educational and artistic processes, Marina directly empowers youth with creative talent and skills while fostering self-confidence, non-violence, discipline, self-respect, leadership and community awareness. Marina believes in the importance of providing a safe, fun and encouraging environment with a small teacher-student ratio.
