

Dear Stowers Families,

Welcome to the 2018-2019 school year! This school year is guaranteed to be filled with learning and growth for each and every student.

Stowers is a Magnet School for International Studies. We are an International Baccalaureate World School. In addition to receiving a world class education in our Primary Years Programme (PYP), our students learn to be principled, communicators, knowledgeable, open-minded, balanced, inquirers, caring, reflective, risk-takers and thinkers. We want all students to develop into life-long learners and become future-ready, college-ready and career-ready.

Stowers continues to grow in our innovative technology integration. Soon, we will be 1:1 in grades 3-6 with the addition of 3 more Chromebook carts. Grades K-2 will share devices as they grow and develop their fine motor skills.

The Stowers staff and I look forward to partnering with you to enrich your child's learning experience through rigorous academic programs and innovative learning. I am really looking forward to meeting all of the Stowers students and families. This school year is going to be the best one yet!

Sincerely,

Pamela Miller

Principal

Stowers Elementary Magnet School of International Studies
