

## CVSD Delivers... More

All 2015 construction bond projects were completed on time and on budget. In addition to the original \$121.9 million bond, we received state matching funds – 85¢ for every \$1 – for an additional \$104 million. **AND, we were able to complete two additional schools than were originally promised—Riverbend Elementary and a new North Pines Middle School.**

All 2018 bond projects are again on time and on budget. The \$129.9 million bond provided for much-needed expanded capacity for our secondary students (new Selkirk Middle School, new Ridgeline High School and a renovated Horizon Middle School). **Because of comprehensive planning, state match, and a cost-effective bid for the new high school construction, we are able to deliver, yet again, more than originally promised.**

## Additional Projects added to the 2018 Bond...

### ● Riverbend Addition: Making room for more elementary students

Riverbend Elementary was designed with the ability to add a wing to serve another 88 students—for a total of 624. The available funds will allow us to complete construction by December 2020. The increased capacity will help us minimize the need for overflowing students.

### ● HVAC Upgrades: Keeping school cool (or warm)

We are already upgrading heating, ventilation and air conditioning (HVAC) at Broadway, Progress and University elementary schools as well as Summit as part of the bond to be completed in summer 2020. Now, we are also able to upgrade the HVAC system at our next school slated for improvements due to age and normal wear and tear—Central Valley High School to be completed in November 2019.

### ● An even playing field: Synthetic turf at all 3 comprehensive high schools

Because we received a cost-effective bid for not only building the new Ridgeline High School but also for the addition of a synthetic turf field, we were able to get competitive pricing for upgrading Central Valley and University High School's fields as well. All three will have green synthetic turf with their names and logos. Without the need for grass recovery in between playing or practice time, we are able to increase the opportunity for student activities by as much as four times (or more) the current on-field time. That's a lot of opportunity for kids in band, color guard, soccer, Lacrosse, football, our middle school teams, youth leagues and more. The existing fields will be complete by fall of 2020 and the new field will open with Ridgeline in 2021.

### Why Now?

These funds are only able to be utilized on new or improved capital facilities. It would be a wasted opportunity not to take advantage of this low bid market and make these capital facilities improvements now. It would cost more to implement any these projects in the future. It would also be opportunity lost for our kids and the increased activities and capacity that these improvements bring. By doing these projects now, it also allows us to maximize resources for the future—focusing on what is needed most.
