

MATH DEPARTMENT

P. 973.790.6200

F. 973.790.6125

Dear Mary Help of Christians Student,

You will need to download the Summer Math Practice for whatever course you will be taking in September 2018 and complete these problems to the best of your ability. Provide worked out solutions on loose leaf paper.

The purpose of the summer math practice is to provide you with an opportunity to review prerequisite skills and concepts in preparation for next year's mathematics course. Some problems will be very easy. Others may be found to be difficult. It is even possible that you may not have had the time in your previous course to develop mastery of some concepts. Answer as many questions as possible. Your teacher will review these problems and their solutions as well as gather diagnostic information. Therefore, these packets are not optional. They are due to your teacher the first day class meets. They will be graded as a homework assignment.

You may use notes from previous courses or on-line tutorials like those at www.KhanAcademy.com to refresh your memory on how to complete these problems. In addition, we will hold two summer math practice review sessions on August 22 and August 23 from 9 AM – 12 noon in Room 402. These dates will also be posted on the calendar. You are welcome to attend, if you are interested.

The greater the effort you make to complete these problems; the greater it will benefit you moving forward.

Sincerely,

Edward M. Zambrano
