Message from the Principal:

May, 2018

Dear Parents,

Each year the State Department of Education provides schools with a "School Profile Report" from the Education Oversight Board and the Office of Accountability. This report provides an overview of how our students performed on the state mandated tests from the previous year. As you can tell, Hodson students outperformed the state average in every subject tested. The report also comes with the most recent demographic information at the school level and at the Owasso district level. Those statistics are used to compare demographic detail of Hodson to the rest of Owasso and to other schools around Oklahoma.

We could not have the success we have at Hodson without family support. Our families take great pride in the quality of the education their children receive. This allows us to set high expectations for our students, and they continue to rise to those expectations. Without support from home we could not challenge our students academically. Attendance is also a major part of student success. Hodson's attendance rate is also higher than the state average. Our student attendance rate is evidence of our community/parents understanding the importance of students being at school and engaged in learning.

Thank you for the continued support of Hodson Elementary students and teachers.

Sincerely,

Charlene Duncan
Principal
Hodson Elementary
