

Collierville has introduced many new courses to its curriculum to help enhance the many opportunities that are afforded the Collierville High School Student. The EPSO's that have been chosen are leading their respective fields, offering our students the opportunity to benefit from different options that were only available once they graduated. Hospitality and Tourism Management is one of those chosen fields.

## Hospitality and Tourism

This class is divided into 2 yearly terms. The first year primarily deals with defining Hospitality and Tourism, the different careers choices, the soft skills needed, the financial and operational process, safety and security, and facilities management. The first-year students are introduced to what it takes to secure and maintain business in a professional manner in order to succeed in this field.

The second year covers leadership within the Hospitality and Tourism industry, focusing on the managerial aspect of the business. This is a very fast-paced and growing business. We are looking for positive, energetic, problem solving students to come and learn of this wonderful field of study.
