

WELCOME TO AP BIOLOGY 2019-2020:

AP summer Biology assignment is as follows,

The students are to obtain a copy of the Campbell Biology textbook 11<sup>th</sup> edition. This can be done during finals week, see Mrs. Lemmon at the bookroom where you will be returning your other books

They are to outline the chapters 1 thru 6 according to the headings and subheadings presented. They are to take down important facts regarding each section. All notes are to be taken in a notebook and handwritten only. This will be a very important resource for the student for the upcoming school year.

The student is to keep a vocabulary list for each chapter. That may be typed and it will be collected on the first day of class. This too will be an important resource for the upcoming school year.

This will be checked upon their return to school and a test on the covered material will follow within the week returning to school.

Chapters 1 thru 6 are due when school reopens.

Thanks

Ms Christina Anderson-Higgins
