

## **AP Chemistry Summer Assignment**

The AP Chemistry summer assignment is in the online textbook and should take a total of 7 to 8 hours to complete. It is important to be comfortable with the material and not just complete the assignment. I highly recommend that you do the assignment in small portions throughout the summer, and not the night before it is due. This assignment is due September 9, 2019. There will be an in class test on the same material shortly after the assignment is due.

To get information on how to login to the online textbook, join the Google Classroom already set up for our class. The code to join the classroom is 5rfw0o. I also sent you an invitation to join the classroom. If you can't join the classroom, or if you can't get a login with the online textbook, please feel free to email me at [dkalapodakis@sboe.org](mailto:dkalapodakis@sboe.org).

Most questions I am able to answer through email. However, if you feel you need more assistance, I will be at school regularly throughout the summer. Send me an email and we can set up an appointment to meet.
