

Dear Puma Family!

A few members of the Ivy Academia Board of Directors and site administration visited the new school site to see firsthand the construction progress of our new campus. Things are moving ahead, and a lot of progress has been made to the site which is not readily visible from the street. As with any construction, there have been some time delays with permits, abatement, and unforeseen hidden additional work found while in construction. The good news is we are moving forward on completion at a steady rate for our anticipated August occupation of our new site.

Currently, the construction that has been completed or nearly completed includes the following:

- Asbestos removed
- Mildew free environment
- 2020 Earthquake retrofitted
- Metal framing
- Steel studs
- New electrical
- New roofing
- All new air-conditioning units in each classroom/room (47)
- New plumbing
- New walls
- New Storm drains in process
- New concrete
- New playground
- Smart Board hookups
- Security cameras
- New paint
- Lighting

Many of these construction pieces are behind the walls and under the ground but are necessary for us to ensure optimum learning environments. Below are some images from the site along with an image of our future goal. As progress is made, we will provide updates. If you have any questions, please feel free to contact the office. In the meantime, our teachers, staff, and administration continue to work hard to provide a world class education for each and every student.

We look forward to seeing our students, staff, and parents walk into our brand-new school. It has been a long road, but we are almost finally there.

Thank you for your patience,

Ivy Academia Board of Directors
