Subject: **Asbestos Hazard Emergency Response Act Notification**

As stated in the Asbestos Hazard Emergency Response Act (AHERA) regulations, Tooele County School District is required to notify in writing to parents, teachers and employee organizations of the availability of our district management plan, that shall include a description of the steps taken to notify organizations, and a dated copy of the notifications.

The management plan was submitted to the Governor's Office on Oct. 12, 1988. A copy is available in the principal's office of each school within our district. A master copy of all the schools will be available in the Tooele County School District Office, (92 Lodestone Way, Tooele, Utah).

Inspections: The location(s) of all asbestos containing materials has/have been determined and its condition assessed for future action. Details are part of the Management Plan located in each school.

Response Actions: This pertains to what Tooele County School District will do with all areas of friable asbestos and is covered in the Management Plan located in each school.

Post Response Action Activities: Continued inspections and surveillance of remaining asbestos material is part of our school district's operation and maintenance program. Details are in the Management Plan located in each school.
