

**West Hempfield
Elementary**
in cooperation with
Mad Science of Pittsburgh
Presents:
The "Brixology"
After School Program

Program Description:

Join us for Brixology, where students will use unique Mad Science designed LEGO® kits to build a different engineering-themed project in every class! They will use critical thinking, cooperation, and creative problem-solving to test and improve your creations! Each class will revolve around a different engineering theme- including mechanical, structural, and nautical engineering. Brixology sets the foundation for our next generation of makers!

About Mad Science®

Mad Science® is the world's leading science enrichment provider, delivering unique science experiences that are as entertaining as they are educational. Mad Science encourages scientific literacy in an age when science is as vital as reading, writing and arithmetic.
