

**Nampa School District No. 131
Request for Proposals—Wireless Access Point Hardware & Installation
Addendum #2—Change to Proposal Submission Date**

The District has determined it is interested in examining leasing options for the hardware detailed in the **Wireless Access Point Hardware & Installation** Request for Proposal due to the District on February 8, 2018.

The District has further determined that such an option is a material change to the original Request for Proposal as published, and that adding this as a purchase option may require a reposting (revision) of the original 470 required under rules for attaining E-rate funding for the purchase.

While it is the intent of the District to examine third-party leasing options separately from the acquisition of the WAP hardware, any respondent to the Request for Proposal may, at its own discretion, offer a leasing option as an alternative to the outright sale of the hardware as contemplated in the original Request for Proposals.

To accommodate this E-rate posting requirement, the District hereby amends the deadline for proposals to be submitted to the District, setting the new deadline as **2:00 pm local time, Thursday, February 22, 2018**.

All other specifications as originally published or as amended under Addendum #1 (Questions and Clarifications) to the Wireless Access Point Hardware & Installation Request for Proposals shall remain in effect.

Issue date: January 24, 2018
