

# September Science Preview in the STEAM Lab with WonderGround Science!

## Pre-K, TK, Kindergarten

**Germ Science:** Three ways to survive Sick-tember and Cough-tober. Your young scientists will practice hand hygiene with glowing germs!

## First Grade

**Celestial Patterns:** Shadows are evidence of celestial movements in space. These scientists will create shadow art.

## Second Grade

**Parts Unknown:** Appliances are excellent puzzles. Our second grade scientists will be assembling "broken" appliances.

## Third Grade

**Building Bridges:** Animal behaviors change as their environments change. Scientists will be building bridges between wildlife and our modernized environments.

## Fourth Grade

**Crash Tests:** Analyzing evidence in crash tests can tell scientists the speed of a traveling car. Let's crash some cars in class!

## Fifth Grade

**Constellation boxes:** The sky's stars have had several purposes throughout history. These young scientists will be reliving the past and reaching for the future.
