74-15-60

A+ Certification/2

Credits: 15
Hours: 180

Course Description:
This competency-based course is the second in a sequence of three designed for computer installation, preventive maintenance, networking, security, and troubleshooting. It provides students with project-based experiences in basic computer and peripheral servicing. Technical instruction includes an introduction and reviews of workplace safety policies and procedures as well as employability skills. Emphasis is placed on current Window-based operating systems and software and their operational procedures. The competencies in this course are aligned with the California High School Academic Content Standards and the California Career Technical Education Model Curriculum Standards.

Prerequisites:
Enrollment requires successful completion of the A+ Certification/1 (74-15-50) course.

NOTE: For Perkins purposes this course has been designated as a concentrator course.

Meets CompTIA A+ Essentials Certification requirements.

This course cannot be repeated once a student receives a Certificate of Completion.
A course outline reflects the essential intent and content of the course described. Acceptable course outlines have six components. (Education Code Section 52506). Course outlines for all apportionment classes, including those in jails, state hospitals, and convalescent hospitals, contain the six required elements:

(EC 52504; SCCR 10508 [b]; Adult Education Handbook for California [1977], Section 100)

**COURSE OUTLINE COMPONENTS**

**LOCATION**

Cover

**GOALS AND PURPOSES**

The educational goals or purposes of every course are clearly stated and the class periods are devoted to instruction. The course should be broad enough in scope and should have sufficient educational worth to justify the expenditure of public funds.

The goals and purpose of a course are stated in the COURSE DESCRIPTION. Course descriptions state the major emphasis and content of a course, and are written to be understandable by a prospective student.

**PERFORMANCE OBJECTIVES OR COMPETENCIES**

Objectives should be delineated and described in terms of measurable results for the student and include the possible ways in which the objectives contribute to the student’s acquisition of skills and competencies.

Performance Objectives are sequentially listed in the COMPETENCY-BASED COMPONENTS section of the course outline. Competency Areas are units of instruction based on related competencies. Competency Statements are competency area goals that together define the framework and purpose of a course. Competencies fall on a continuum between goals and performance objectives and denote the outcome of instruction.

Competency-based instruction tells a student before instruction what skills or knowledge they will demonstrate after instruction. Competency-based education provides instruction which enables each student to attain individual goals as measured against pre-stated standards.

Competency-based instruction provides immediate and continual repetition and In competency-based education the curriculum, instruction, and assessment share common characteristics based on clearly stated competencies. Curriculum, instruction and assessment in competency-based education are: explicit, known, agreed upon, integrated, performance oriented, and adaptive.
COURSE OUTLINE COMPETENCY-BASED COMPONENTS
(continued)

COURSE OUTLINE COMPONENTS

INSTRUCTIONAL STRATEGIES

Instructional techniques or methods could include laboratory techniques, lecture method, small-group
discussion, grouping plans, and other strategies used in the classroom.

Instructional strategies for this course are listed in the TEACHING STRATEGIES AND EVALUATION section
of the course outline. Instructional strategies and activities for a course should be selected so that the
overall teaching approach takes into account the instructional standards of a particular program, i.e.,
English as a Second Language, Programs for Adults with Disabilities.

UNITS OF STUDY, WITH APPROXIMATE HOURS ALLOTED FOR EACH UNIT

The approximate time devoted to each instructional unit within the course, as well as the total hours for
the course, is indicated. The time in class is consistent with the needs of the student, and the length of
the class should be that it ensures the student will learn at an optimum level.

Units of study, with approximate hours allotted for each unit are listed in the COMPETENCY AREA
STATEMENT(S) of the course outline. The total hours of the course, including work-based learning hours
(community classroom and cooperative vocational education) is listed on the cover of every CBE course
outline. Each Competency Area listed within a CBE outline is assigned hours of instruction per unit.

EVALUATION PROCEDURES

The evaluation describes measurable evaluation criteria clearly within the reach of the student. The
evaluation indicates anticipated improvement in performances as well as anticipated skills and
competencies to be achieved.

Evaluation procedures are detailed in the TEACHING STRATEGIES AND EVALUATION section of the
course outline. Instructors monitor students’ progress on a continuing basis, assessing students on
attainment of objectives identified in the course outline through a variety of formal and informal tests
(applied performance procedures, observations, and simulations), paper and pencil exams, and
standardized tests.

REPETITION POLICY THAT PREVENTS PERPETUATION OF STUDENT ENROLLMENT

After a student has completed all the objectives of the course, he or she should not be allowed to
reenroll in the course. There is, therefore, a need for a statement about the conditions for possible
repetition of a course to prevent perpetuation of students in a particular program for an indefinite
period of time.
ACKNOWLEDGMENTS

Thanks to PAUL PIDOUX and MARCELA BAKER for developing and editing this curriculum. Acknowledgment is also given to ERICA ROSARIO for designing the original artwork in the course cover designs. T

JOE STARK
Executive Director
Division of Adult and Career Education
1.0 Academics
Analyze and apply appropriate academic standards required for successful industry sector pathway completion leading to postsecondary education and employment. Refer to the Information and Communication Technologies academic alignment matrix for identification of standards.

2.0 Communications
Acquire and accurately use Information and Communication Technologies sector terminology and protocols at the career and college readiness level for communicating effectively in oral, written, and multimedia formats.

3.0 Career Planning and Management
Integrate multiple sources of career information from diverse formats to make informed career decisions, solve problems, and manage personal career plans.

4.0 Technology
Use existing and emerging technology, to investigate, research, and produce products and services, including new information, as required in the Information and Communication Technologies sector workplace environment.

5.0 Problem Solving and Critical Thinking
Conduct short, as well as more sustained, research to create alternative solutions to answer a question or solve a problem unique to the Information and Communication Technologies sector using critical and creative thinking, logical reasoning, analysis, inquiry, and problem-solving techniques.

6.0 Health and Safety
Demonstrate health and safety procedures, regulations, and personal health practices and determine the meaning of symbols, key terms, and domain-specific words and phrases as related to the Information and Communication Technologies sector workplace environment.

7.0 Responsibility and Flexibility
Initiate, and participate in, a range of collaborations demonstrating behaviors that reflect personal and professional responsibility, flexibility, and respect in the Information and Communication Technologies sector workplace environment and community settings.

8.0 Ethics and Legal Responsibilities
Practice professional, ethical, and legal behavior, responding thoughtfully to diverse perspectives and resolving contradictions when possible, consistent with applicable laws, regulations, and organizational norms.

9.0 Leadership and Teamwork
Work with peers to promote divergent and creative perspectives, effective leadership, group dynamics, team and individual decision making, benefits of workforce diversity, and conflict resolution such as those practiced in the Future Business Leaders of America and SkillsUSA career technical student organization.

10.0 Technical Knowledge and Skills
Apply essential technical knowledge and skills common to all pathways in the Information and Communication Technologies sector, following procedures when carrying out experiments or performing technical tasks.

11.0 Demonstration and Application
Demonstrate and apply the knowledge and skills contained in the Information and Communication Technologies anchor standards, pathway standards, and performance indicators in classroom, laboratory, and workplace settings, and through career technical student organizations such as Future Business Leaders of America and SkillsUSA.
B. Networking Pathway
Students in the Networking pathway prepare for careers that involve network analysis, planning, and implementation, including the design, installation, maintenance, and management of network systems. The successful establishment, maintenance, and securing of information and communication technologies infrastructure is critical to the success of every twenty-first century organization. Employment continues to grow for persons with expertise in networking.

Sample occupations associated with this pathway:
• Computer Security Specialist
• Network Technician
• Network Engineer
• Network Administrator
• Telecommunication Specialist

B1.0 Identify and describe the principles of networking and the technologies, models, and protocols used in a network.

B2.0 Identify, describe, and implement network media and physical topologies.

B3.0 Install, configure, and differentiate between common network devices.

B4.0 Demonstrate proper network administration and management skills.

B5.0 Demonstrate how to communicate and interpret information clearly in industry-standard visual and written formats.

B6.0 Use and assess network communication applications and infrastructure.

B7.0 Analyze a customer’s organizational needs and requirements to identify networking needs.

B8.0 Identify security threats to a network and describe general methods to mitigate those threats.
## A. INTRODUCTION AND SAFETY

Review, apply, and evaluate classroom and procedures used in accordance with federal, state, and local safety and environmental regulations.

# B. OPERATING SYSTEM (OS) AND SOFTWARE

Understand, apply, and evaluate the basics of operating systems and software.

## 1. Identify and describe the following:
- Sidebar
- Windows Aero
- User Account Control (UAC)
- Minimum system requirements
- System limits
- 32bit
- 64bit
- X86
- X64
- Application compatibility, installed program locations (32bit vs. 64bit)
- Windows Explorer
- User interface, star bar layout

## 2. Describe and demonstrate the proper use of the following user interfaces:
- Windows Explorer
- My computer
- Control panel
- Command prompt utilities
  - Terminal Network (telnet)
  - Ping
  - Internet Protocol Configuration (ipconfig)
- Run line utilities
  - Microsoft configuration System Utility (msconfig)
  - Msinfo32
  - Direct X Diagnostics (DXdiag)
  - Cmd
  - Registry Edit (REGEDIT)
- My Network Places
- Taskbar/systray
- Administrative Tools
  - Performance monitor
  - Event viewer
  - Services
  - Computer management
- Microsoft Management Console (MMC)
- Task Manager
- Start menu

**COMPETENCY CHECKLIST**
TEACHING STRATEGIES and EVALUATION

METHODS AND PROCEDURES

A. Lecture and discussion
B. Multimedia presentations
C. Demonstrations and participations
D. Individualized instruction
E. Peer teaching
F. Role-playing
G. Guest speakers
H. Field trips and field study experiences
I. Projects

EVALUATION

SECTION A – Introduction and Safety – Pass the safety test with 100% accuracy.

SECTION B – Operating Systems (OS) and Software – Pass all assignments and exams on operating systems (OS) and software with a minimum score of 80% or higher.

SECTION C – OS and Software: Windows 2000 – Pass all assignments and exams on OS and software: Windows 2000 with a minimum score of 80% or higher.

SECTION D – OS and Software: Windows XP Professional – Pass all assignments and exams on OS and software: Windows XP Professional with a minimum score of 80% or higher.

SECTION E – OS and Software: XP Home – Pass all assignments and exams on OS and software: XP Home with a minimum score of 80% or higher.

SECTION F – OS and Software: XP MediaCenter – Pass all assignments and exams on OS and software: XP MediaCenter with a minimum score of 80% or higher.

SECTION G – OS and Software: Windows Vista Home – Pass all assignments and exams on OS and software: Windows Vista Home with a minimum score of 80% or higher.

SECTION H – OS and Software: Home Premium – Pass all assignments and exams on OS and software: Windows Home Premium with a minimum score of 80% or higher.
SECTION I – OS and Software: Business and Ultimate – Pass all assignments and exams on OS and software: Business and Ultimate with a minimum score of 80% or higher.

SECTION J – Operational Procedures – Pass all assignments and exams on operational procedures with a minimum score of 80% or higher

SECTION K – Employability Skills Review – Pass all assignments and exams on employability skills review with a minimum score of 80% or higher.
