Grade Point Average (GPA)

- ❖ Computed by adding numerical grades from eligible semester credits, with corresponding quality points; and dividing by the total number of attempted credits.
- ❖ Eligible credits are those attempted in accredited courses in grades 9, 10, 11 and the fall of grade 12. Eligible credits also include credit by acceleration; credit by exam; and the following approved courses – summer school, night school and correspondence.
- ❖ Quality points shall be used to weight semester grades of 70 and above for calculating GPA and RIC. Fifteen (15) points will be added to the semester average to calculate the GPA for students in a Pre-Advanced Placement (Pre-AP), Dual Credit (DC) or an Advanced Placement (AP) class. This weighting applies only to semester averages of 70 and above. Students must remain in the course for the full semester for quality points to be awarded.

Rank in Class:

1. Grade point average (GPA) is expressed as a mathematical average calculated to five decimal places as necessary. GPA is determined by adding eligible semester grades (with quality points earned) and dividing by the total number of credits attempted.
2. Eligible semester grades earned in grades 9, 10, 11, the fall semester of grade 12 or at graduation shall determine GPA and rank in class (RIC).

Grades for calculating formal GPA are those earned through:

1. The regular school year
 2. Approved correspondence courses
 3. Grades earned through Credit by Exam
 4. Credit by Exam for Acceleration
 5. Approved Dual Credit
 6. District and other approved summer school programs
 7. Approved night school programs
 8. Transfer Grades/Credit
3. $GPA \div 100 = X4 = GPA(4.0 \text{ Scale})$
4. **GPA Calculations**
- Pre-AP Semester grade + 15 points
AP/DC Semester grade + 15 points
