

Student iPad Requirements 2018

- iPad must have storage capacity of at least 32GB. (iPads also come in 64GB and 128GB, but it is optional to purchase an iPad with higher storage capacity.)

- *iPad must be Wi-Fi-only model, not the cellular model.*

- You may choose between full-size iPad (9.7" screen) or the iPad Mini (7.9" screen) in either black, white, or gold (those are the color options from Apple).

- You must provide a good case for the iPad. Recommended case manufacturers are OtterBox or LifeProof, which may cost a little more than regular iPad cases but offer good all-around protection in the event of a drop.

- We recommend that you have AppleCare+ Protection Plan (APP+). APP+ provides two years of coverage from any manufacturer defect, as well as two incidents of physical and/or liquid damage. Purchasing APP+ is not required but highly recommended.

Example: If the screen cracks, Apple will need to replace the whole iPad, and can cost \$250 or more as an out-of-warranty replacement, whereas an iPad replacement will cost \$49 under APP+.

AppleCare+ costs \$99 for two years of coverage from the original purchase date and can be obtained within 60 days of the original purchase date.

Note: iPads can be purchased at major retail stores (Walmart, Target, Best Buy, etc.) but it is recommended that iPads be purchased at the Apple Store or Apple Online Store, especially if you are considering purchasing AppleCare+. There are three Apple Stores that serve the Pope John region:

- Apple Store, Rockaway (Rockaway Townsquare)
- Apple Store, Willowbrook (Willowbrook Mall)
- Apple Store, Bridgewater (Bridgewater Commons)
