AP Psychology: Chapter 5 Essays
Essays 1-3 to be written in class on Tuesday, October 31st

1. Explain classical conditioning. Make sure you include (and define) the following:
   UCS, UCR, CS, CR, acquisition, extinction, and spontaneous recovery.

2. Describe and give one example for each of the following: conditioned taste aversions, conditioned emotional responses, and conditioned immune responses.

3. Describe the little Albert experiment conducted by John B. Watson and Rosalie Rayner. What was the impetus for doing that experiment?
