

# SOMERSET COUNTY TECHNICAL HIGH SCHOOL

OPENING FALL 2019

Somerset County Public Schools is excited to announce a brand new, state-of-the-art, Career and Technology Center opening for the 2019-2020 school year. Somerset County Technical High School will provide students enrolled in Somerset County Public Schools access to fourteen different Career and Technology Education Programs offered by the Maryland State Department of Education. With the latest, cutting edge technology as instructional tools, instructors will provide students with the necessary training to pursue successful careers as they enter college or the workforce upon graduation.

This project, with a total price tag of over 42 million dollars, is the largest school construction project that Somerset County has ever completed. Without the unwavering support of the Somerset County Commissioners, the Somerset County Board of Education, and the Board of Public Works, led by Governor Hogan, this project would not be possible.

We welcome the support of our students, parents, community members, and industry partners as we prepare to open our doors in September of 2019. For more information on how you can help contribute to this very important project, please e-mail Daniele Haley at [dhaley@somerset.k12.md.us](mailto:dhaley@somerset.k12.md.us)

## PROGRAMS OF STUDY
