

## **Materials:**

The following items are required for class. You must bring all of these to class each and every day. If you come to class without the following supplies, it will be your responsibility to borrow from a classmate before class begins without disrupting the rest of the class.

Textbook: Earth Science (Holt McDougal)

Your MCHS Student Handbook: Random “extra credit” will be rewarded for consistently recording assignments!

A three-ring binder (2”) and at least five dividers – The binder and its contents should be used for Earth Systems only! Your binder should include the following:

Pencil pouch containing pencils, pens, a highlighter, and a scientific calculator

Your course syllabus (this page!)

Dividers for:

Notes (a notebook inside the binder or loose-leaf paper)

Homework assignments

Labs

Quizzes

Tests

The binder at first appears a bit elementary. However, course binders help you organize your class materials, save time and allow for more efficient study, and will help you prepare for the semester exams.
