

Steps To Set Up Your Background

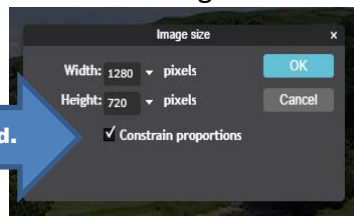

In Google, select a photo that is at least 800x600 pixels in size. Save it to your **H://drive > PIT > Photo Editing > Backgrounds** folder

- **File > Open Image > H://drive > PIT > Photo Editing > Backgrounds** > select your saved Background Pictures
 - Once picture is loaded into Pixlr, look at the bottom, left corner

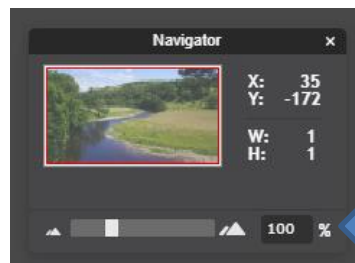

- If either pixel (px) number is higher than 900, you will need to do the following steps. *(This keeps your computer from lagging.)*

- Go to Image on the menu bar > click Image size

- Change the higher number to 900. *(The other number will change automatically.)*
- Click **OK**
- Use the **Navigator menu** slide bar or type **100** in the lower left corner of the **Navigator menu** to zoom to 100%

Type 100 and press enter.

- Maximize to make your pic full screen.

- **SAVE AS:**
 - Name the file: **Edited Background**
 - Format: **.PXD** (Layered Pixlr image)
 - Double click your **H://drive > PIT** folder > **Photo Editing > 3_Working Parts of Pic > Save**
