

Hello future AP Statistics student,

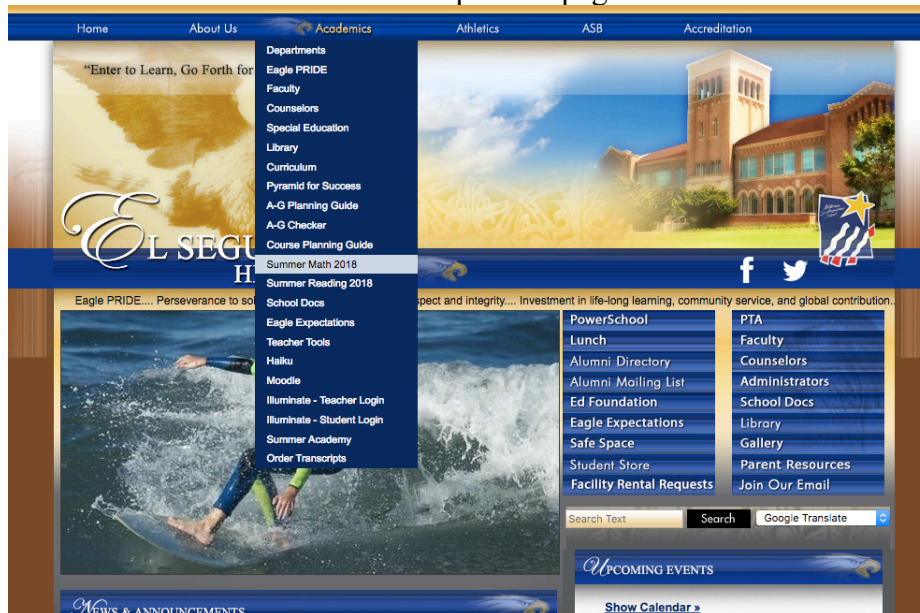

You've made a great course selection. AP Statistics is challenging but it will send you away with information that you can use and apply in many real life contexts.

As this is an AP/College level course, it will be rigorous. You are encouraged to relax over the summer so you are refreshed and ready to work hard when you enter the AP Statistics classroom in the fall.

If you would really like to get some practice in over the summer, there are some suggested study materials available on the high school website.

Simply do the following to access these materials:

- Visit <https://www.elsegundohigh.org/>
- Click on the Academics tab at the top of the page

- Click on Summer Math 2018
- Click on the AP Statistics Summer Packet located at the bottom of the page.

Enjoy your summer, rest your brain, and get ready to show perseverance in the fall when you come to AP Statistics class.

Sincerely,

Mr. Whalen  
Your future AP Statistics teacher
