

APCS-A Summer **OPTIONAL** Work

If you would like to get ahead so that you feel more comfortable with learning programming or if you have no previous programming experience, here are some options to help you get started over the summer. NOTE: None of this will be graded for the class. This is OPTIONAL work to help you prepare for the class.

- codehs.com/go/D271A
 - Go to the link above and create an account. The class join code is D271A.
 - Set up an account
 - You will be in the AP Computer Science in Java course.
 - Try to work on one or both of the following units:
 - Introduction to Programming in Java with Karel the Dog
 - Basic Java
 - Don't worry if you cannot do all the problems. Do your best and if you get stuck on one, move on and try another.
- <https://books.trinket.io/thinkjava/>
 - The link above will allow you to access an online interactive book on Java.
 - If you are interested, try working through the first 3-5 chapters.
