ACE IS THE PLACE TO BE

ACE is a Texas Afterschool Center Education program that provides extended learning opportunities for children and their families. 21st Century ACE offers innovative, hands-on activities that reinforce and compliment students' regular academic program.

The main focus of ACE is to prepare students for graduation, college, and the workforce. Ultimately, this helps students to become engaged contributors of the community.

We have great activities and events planned for The 2019-2020 school year. We will be utilizing ZSPACE (pictured above), an interactive 3D program where students will be able to create lifelike experiences that will broaden their curiosity and develop a better understanding of lessons.

If you have any questions about ACE, reach out to our ACE coordinators at each campus.
