

**STUDENT BOARD REPRESENTATIVES**

The Governing Board believes that regular direct communication with students is beneficial to understanding their successes, attitudes, problems and needs. For this reason, students from the junior high school and alternative high schools are selected according to established procedures at their school sites to serve as Student Board Representatives. The primary role of Student Board Representatives is presenting monthly reports at Board meetings.

While Student Board Representatives do not enjoy the same rights and responsibilities afforded Student Board Members, they provide a valuable service which links the Board to their campus communities
