- Michigan Works!
- MyCare Health Center
- Paslin
- Sheet Metal Workers Local 80
- TACOM
- Whitlam Group

Principal - Andrea Szabo
Assistant Principal - Klaressa Howery
Academy Coach - David Roman
The District’s Strategic Planning Goal is that all students who graduate from Center Line High School will exit with an industry-recognized certification and/or college credit.

- Students begin their journey in the Ninth Grade Academy.
- A team of teachers wraps around each freshman, working to ensure preparedness socially, emotionally, and academically.
- Students explore their strengths and interests through career cruising, surveys and inventories such as MI Bright Future, and business partner relationships.
- As sophomores, students choose which pathway best suits them in the Academy of Industry, Technology & Innovation or the Academy of Health & Human Services.

Through the development of small learning communities centered around these two academies, our students are exposed to a multitude of careers, industry skills, and potential employers through classroom speakers, site visits, job shadowing, and internships.

“To show a high school student real world applications to what they are learning in class, and engage them in the process with something they are interested in, creates an opportunity for deep and meaningful learning. I wish that academies had been offered when I was in school.”

- Robert Binson
  Mayor, City of Center Line

“The City of Center Line is proud to be a partner with Center Line High School’s Career Academies.”

- Dennis Champine
  City Manager, City of Center Line
