

# How to access district links (such as Pearson Realize & MobyMax) through Clever

Accessing district links from home can be complicated and could be different depending on the type of device being used by a parent or student. Utilizing Clever SSO (single sign-on) to access these links will help make the process less complicated.

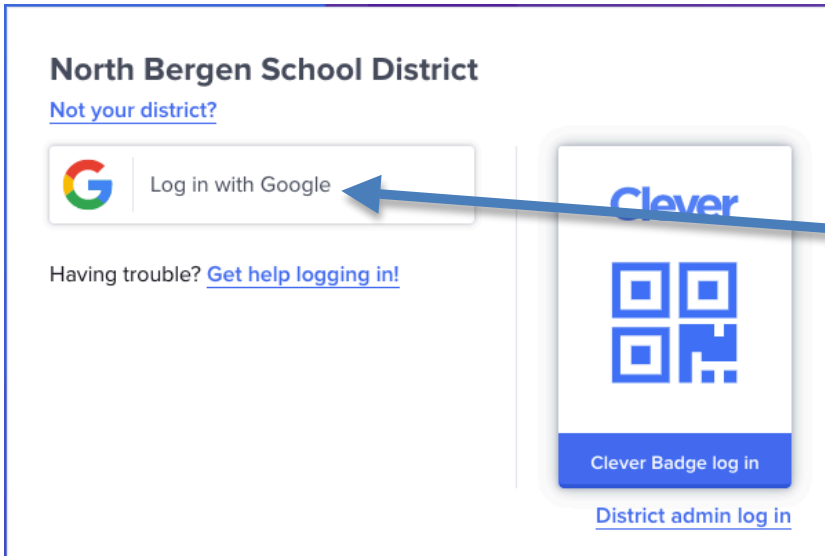

## Step 1: Go to the North Bergen District web site – [www.northbergen.k12.nj.us](http://www.northbergen.k12.nj.us)

## Step 2: Parents section -> select Clever SSO

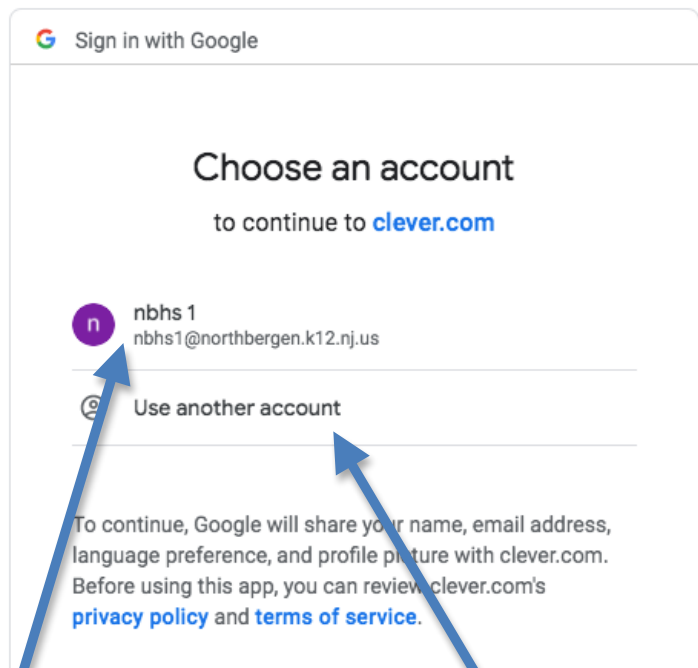

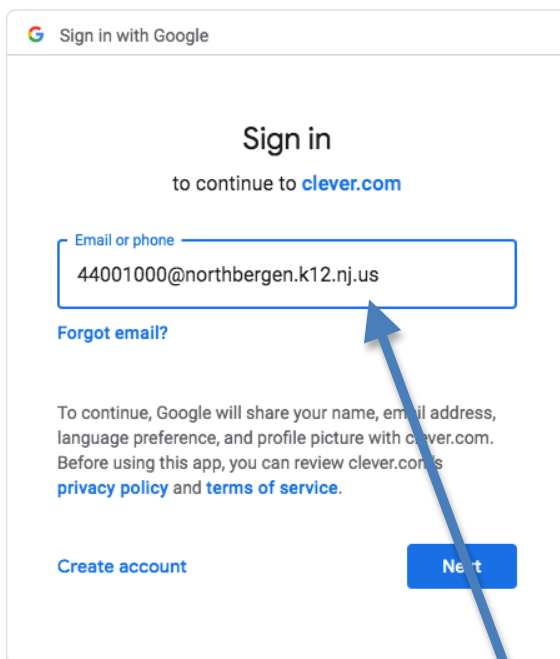

### Step 3: Log in with Google

On the following screen,  
click on

“Log in with Google”

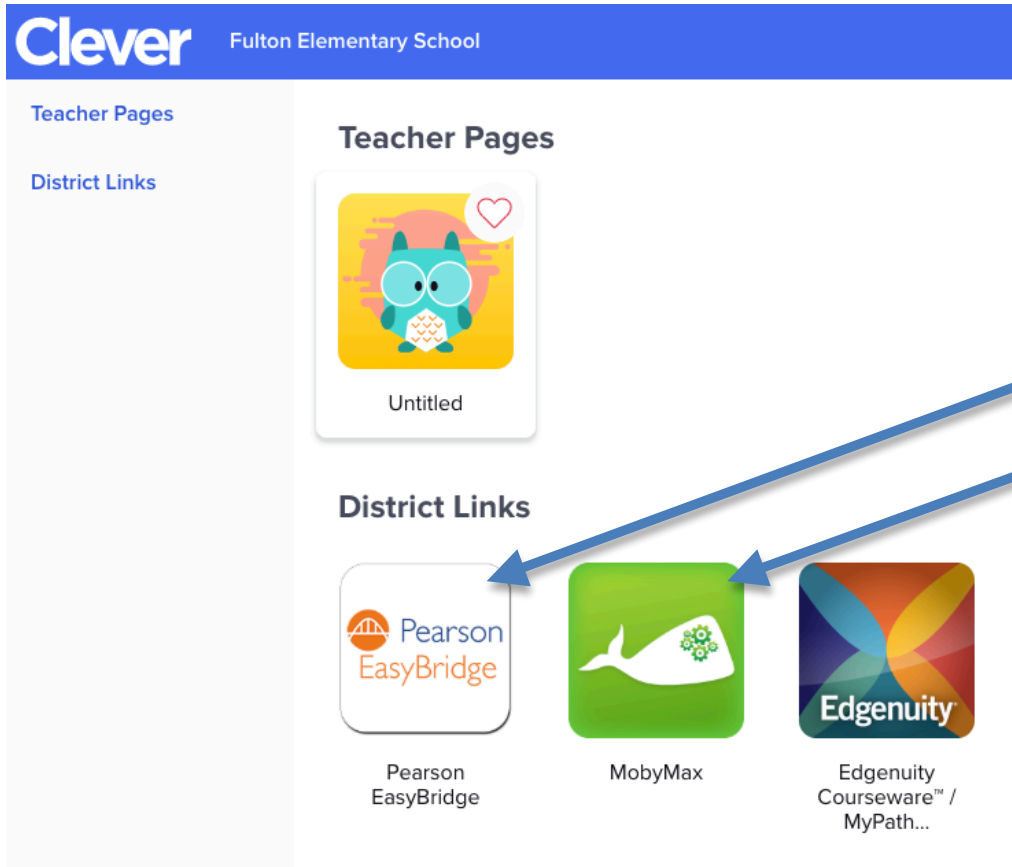

### Step 4: Google sign in – Use student’s school issued Google account

The following screen will be either to “Sign in” to your Google account or to “Choose an account” that is already logged in. For either screen, you must use the school issued Google account and not a personal Google account.

If the student’s account is not listed as a choice, select “Use another account”.

## Step 5: Clever landing page

After logging in with your school issued Google account, you will see a page similar to this.

The District Links will provide you access to many of our resources such as MobyMax or Pearson EasyBridge/Realize.
