Recommended Math Summer Homework

(for students entering grades 6, 7, and 8)

Dear Parents and Students,

Attached is the STAR Math Individualized Instructional Planning Report of your child. Although this summer homework is OPTIONAL (but encouraged), I highly recommend that your child practice the suggested skills that are written in the STAR report to ensure that your child is prepared in context knowledge and skills for the upcoming school year by using the IXL.

The IXL is a math practice website that has unlimited questions on thousands of math topics. It is a good online resource that gives a visual explanation if your child gets a question wrong. I recommend solving the problems on paper before entering the answer. Your child will not benefit in the long run by solving the problems using a calculator.

Students must log into IXL.com each time you work on your assignments, otherwise, your scores will not be recorded in your IXL account. When you log into IXL, search a topic or skill that is listed in your STAR Planning Report. The IXL will give you a list of math topics and corresponding grade level that you can use to reinforce your skill.

Please let me know if you need help with your username and password.

Have a safe and fun-filled summer vacation.

Sincerely,

Mrs. Patriarca
Middle School Math Teacher

NAME: _____

Please turn in this paper during the first week of school. Thank you.
