

# NEWTON COUNTY ELEMENTARY / MIDDLE / HIGH SCHOOL

Parents,

The state department of education requires that any student with Diabetes must have a written statement (Diabetic Management Plan) from their health care practitioner each year they are in school. If you indicated that your son or daughter may have a mild to severe form of diabetes on their student health form, a Diabetic Management Plan will have to be completed by a physician. These are necessary to allow school personnel to recognize and treat high or low blood sugar emergencies while at school.

The action plan may be printed from the website or will be sent home with the student. Some physicians may prefer to use their own. Take the form to the student's practitioner to complete the information regarding diabetic management while at school. They may fax the completed form to the School Office or you may bring the form back to the School Nurse Office.

Students may self-carry diabetic supplies as well as leave them in the nurse office as indicated by their practitioner. Please get this form completed and returned as soon as possible, and remember that it has to be updated each school year. If you have any questions or concerns, please call the school nurse.

Sincerely,

Patty Gibson, RN  
NC Elementary School Nurse

Rae Hollingsworth, RN  
NC Middle / High School Nurse
