

NEWS FROM THE NURSE 3/7/19

I am happy to report that there have been no new reported cases of flu in our school. Flu season can extend into April in New Jersey. Please do not send sick children to school...they cannot perform at his or her best and it is unfair to their classmates and teachers.

I will begin the annual health screenings mandated by the state in the very near future. Blood pressure, scoliosis, height, weight and hearing will be screened. Any parent that does not want his or her child screened must notify the health office in writing.

Spring is around the corner. Remember to turn your clocks ahead this weekend.
