AT HOME:
STAFF, STUDENT & VISITOR
SELF-SCREENING CHECKLIST

If a child, staff or visitor has any of the symptoms listed in the Self Screening Checklist below, this indicates a possible illness and put them at risk for spreading to others.

**SELF SCREENING QUESTIONS TO ANSWER EACH DAY:**

- Do I have any of the following symptoms?
  - Temperature of 100.4 degrees Fahrenheit or higher when taken by mouth
  - Sore throat
  - Diarrhea, vomiting or abdominal pain
  - New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline).
  - New onset of severe headache, especially with fever
    - **Yes**
    - **No**

- Have I traveled internationally within the last 14 days?
  - **Yes**
  - **No**

- Have I had close contact (within 6 feet for at least 15 minutes - including with members of your household) with a confirmed/probable COVID-19 case in the past 14 days?
  - **Yes**
  - **No**

**HOW TO RESPOND:**

- If you have answered NO to all questions, you have passed the screening and can begin working, attend school or visit school.
- If you answered YES to any screening questions, you have failed the screening. The individual must notify the school, stay home, and consider testing / contacting their preferred healthcare provider. Visitors who failed the screening are not allowed into school buildings.
- Students, Staff and Visitors who exhibit any of the above symptoms but who have no close contact/potential exposure history should not go to school or any school activity. If at school or any school activity, they should be sent home. These individuals may return to school 24 hours after resolution of fever (if there was a fever) and improvement of symptoms.
- Students, Staff and Visitors who exhibit any of the above symptoms and who have a close contact/potential exposure history should not go to school or any school activity. If at school or any school activity, they should be sent home. These individuals should be evaluated by a healthcare provider and tested for COVID-19 with a diagnostic test (nose/throat swab) and follow isolation recommendations of health care provider/health department.
