Lesson Duration: Two 60 minute sessions
1. Cover the elements of art: **Form, Color, and Texture**.
2. Gather images of each of the elements of art leading into class discussion and assessment of collected images.

Performance Objective: Upon completion of this lesson, the student will be able to classify and assess the elements of art in print media, art, and the environment. Students will be able to apply elements when creating art.

Specific Objectives:

1. Identify the **elements** of art.
2. Describe the characteristics of **form**.
3. Classify color and apply **color** to drawings.
4. Describe the characteristics of **texture**.

Materials Needed:

1. ---Magazines, newspaper, any place where images are found.
2. ---Pencils, colored pencils or crayons or colored pens or markers, glue or sticks, tape and scissors.

How are the elements of art used? The **elements** and principles of design are the building blocks **used** to create a work of **art**. **Elements of Art** are the visual "tools" that artists use to create an **art** work - they are what makes up
FORM

Definition of form: ________________________________________________________________
________________________________________________________________________________
________________________________________________________________________________
________________________________________________________________________________

Apply Value (lights and darks) to turn shapes into forms. Draw the examples below.
COLOR

Definition: ___________________________________________________________
__________________________________________________________________________

Collect and paste examples of the three PRIMARY COLORS. (Red, Yellow and Blue) Or create a drawing of your choice using the three Primary Colors below.

You may include secondary colors for extra credit. (Green, orange and purple)
TEXTURE

Definition: __________________________________________________________

List 5 different types of TEXTURE you’ve observed from the physical world and draw examples of each below:
Elements of Art

Line - an element of art that is the path of a moving point through space. (They can have different lengths, widths, textures, and directions)

Color - an element of art that is derived from reflected light.

Texture - an element of art that refers to how things, or look as if they might feel if touched.

Form - an element of art that defines a two dimensional space. This element only has height and width.

Shape – an element of art that is three-dimensional and encloses space. This element has length, width, and depth. Can be free-form or geometric.

Value- an element of art that describes the lightness and darkness of an object.

Use the vocabulary and definitions to complete the matching worksheet on the next page.
Matching – Elements of Art

1) Line -
2) Color -
3) Texture -
4) Form -
5) Shape -
6) Value -

a) An element of art that defines a two dimensional space. This element only has
   height and width. Can be free-form or geometric

b) An element of art that is derived from reflected light.

c) An element of art that describes the lightness and darkness of an object.

d) An element of art that is the path of a moving point through space. (They can
   have different lengths, widths, textures, and directions)

e) An element of art that refers to how things, or look as if they might feel if
   touched.

f) An element of art that is three-dimensional and encloses space. This element
   has length, width, and depth.
