Painting / Renovation Projects Underway

Many schools are getting painting done to improve the looks of the schools and improve the learning environments. The athletic facilities at **Wade High School** are also getting some work done. The baseball fieldhouse has been renovated by **DeKelly**

The Buzz from the Ben Hazel Hive

Third grade students in **Marlene Terry's** visual art class have been learning about the South Carolina Regions in a "hands on" way. They glued sand and seashells on the Coastal region, glued four blue rivers which run through the Outer Coastal,

planted trees in the Inner Coastal, and covered the Sandhills in sand. Red clay and clay hills were smeared over the Piedmont and the mountains were formed in the Blue Ridge region. The students had lots of messy fun! Thanks to **Melonee Mattie** for the leftover wedding greenery.

Pittinger and other volunteers. The School Board has approved other painting projects as well.
