

Secondary Review of Learning Supplementary Resources

We know that as a community of learners, you seek to enrich your children's lives through various means: from arts activities, to sports, to library time, to museum visits. We also know that during this time of social isolation that you might be looking for activities to do with your children, and we would like to take the opportunity to remind you of the wide range of supplementary educational resources that are available to you and your children at home while schools are closed.

The activities described below are optional and directed toward reinforcing and reviewing the knowledge and skills learned this school year. Feel free to use as many resources as you would like from the below listing or from the materials that teachers sent home on March 13, based on your individual family situation and the needs of your children.

SPUSD is expecting to receive clarity and additional guidance from the California Department Education before March 20 regarding independent study/distance learning and special education services. If school closures are extended beyond SPUSD's current return date of April 6, more information will be provided about independent study/distance learning and special education services for SPUSD students.

Educational TV Streaming: PBS and KCET will be streaming educational content to students daily that can be accessed through multiple sources. Please visit the following websites for programming notes and additional resources.
