Getting To Know Your Biology Book

1. What is the title of the biology book?

2. Who are the authors of the book?

3. When was the book published and by who?

4. How many chapters does the book have?

5. How many units are there?

6. Which unit seems most interesting to you? Why?

7. Which unit seems most boring or least interesting to you? Why?

8. On what page do the contents begin and end?

9. What page does the index start on?

10. What is the definition of angiosperms and what page is it found in the book?

11. If you want to know what a “codon” is, where in the book could you find the answer?

12. Take your book to a scale in your house and weight it. (If you don’t have a scale, take a guess.)

Please also go online to our Biology class home/main page (with a picture of puppies), click on “Show Class Links”, and check out the “Online Biology Textbook”. This online book could help you to complete homework assignment when you forget to bring textbook home.
